

# Social gathering for young scientists

## - Joint event with Japan-Korea student exchange -

Date  
&  
Time

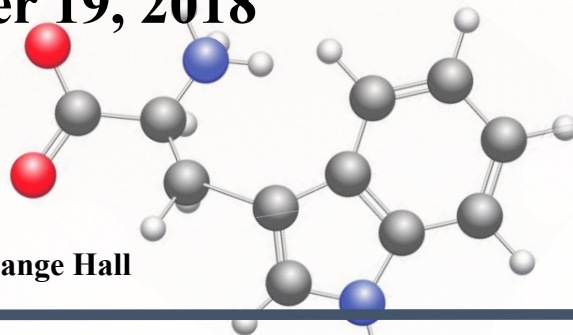

**Wednesday, September 19, 2018**  
**18:00-20:30**

Venue

### Meeting Room

The University of Shiga Prefecture  
Center for Academic and Cultural Exchange Hall

**Combination of prenatal nicotine exposure and adolescent isolation stress induce behavioral abnormalities with alternations of tryptophan metabolism in adult mice**

Poster 1

**Ms. Yuko Mori**

Graduate Student, Department of Disease Control and Prevention, Fujita Health University

**PKC  $\delta$  and NADPH oxidase mediates methamphetamine-induced dopaminergic neurotoxicity**

Poster 2

**Ms. Hai-Quyen Tran**

Graduate Student, Division of Neuropsychopharmacology and Toxicology Program, Kangwon National University

**Development of kynurenine aminotransferase II inhibitor screening assay**

Poster 3

**Ms. Kyoka Yamazaki**

Graduate Student, Department of Disease Control and Prevention, Fujita Health University

**Glutathione peroxidase-1 attenuates phencyclidine-induced abnormal behaviors**

Poster 4

**Dr. Naveen Sharma**

Postdoctoral fellow, Division of Neuropsychopharmacology and Toxicology Program, Kangwon National University

**Involvement of noradrenergic malfunction in the behavioral changes in MAGE-D1 knock out mice**

Poster 5

**Ms. Mami Hirakawa**

Graduate Student, Department of Regulatory Science for Evaluation & Development of Pharmaceuticals & Devices, Fujita Health University

**19:00-20:30 A banquet will be held after Joint event.**
